

Project Name:	Order Number:	Prepare by:	Note:	Date:	Type:

The Wireless IR Configuration Tool is a handheld remote control designed for easy configuration of IA-enabled fixture integrated sensors without the need for ladders or tools. It allows users to modify device settings via a push button and can store up to four sensor parameter modes for efficient setup across multiple sensors, with a transmission range of up to 50 feet from a mounting height. The tool operates on two AAA 1.5-Volt alkaline batteries and comes in a carrying case, featuring a 940 nm infrared transmitter and receiver, with an operating temperature range of 0°C to 50°C. Its compact dimensions are 4.84 in. x 2.76 in. x 0.8 in.

### HIGHLIGHT

#### Easy Remote Configuration

Modify IA-enabled sensors from up to 50 ft away without need for ladders or tools

#### Efficient Mode Storage

Stores up to four sensor parameter modes for quick setup across multiple sensors.

### TECHNICAL SUMMARY

MODEL NO.	WATTS	LUMENS	CCT	VOLTAGE	DIMMING	CRI	CERTIFICATION
RC-100				1.5Volt
