

## Single Pole Rocker Wall Switch

Project Name:	Order Number:	Prepare by:	Note:	Date:	Type:

This MWS series constructed from high-quality, impact-resistant PC and solid zinc-plated steel, this single-pole double rocker switch is designed for enhanced strength and durability, ensuring an extended service life. Its shallow body design allows for faster and easier installation through both back and side wiring, fitting standard junction boxes for optimal flush alignment. Suitable for residential and most commercial applications, these UL-certified switches are perfect for areas such as living rooms, bedrooms, kitchens, home offices, and garages, all while handling up to 15 Amps. With a 2-year warranty, we offer quick-response after-sales service, providing professional technical guidance and fast replacement should you encounter any issues.

MSW-01

MSW-02

### HIGHLIGHT

#### Durable Design

Made from high-quality, impact-resistant PC and solid zinc-plated steel.

#### Easu Installation & Support

Features a shallow body design for quick installation via back or side wiring.
