

## Dimmer Switch

Project Name:	Order Number:	Prepare by:	Note:	Date:	Type:

The Dimmer Switch offers smooth, flicker-free lighting control for creating the perfect ambiance in any space. Designed to replace standard wall switches, it allows users to easily adjust brightness to their desired level, enhancing comfort and energy efficiency. Its sleek decorator-style rocker provides a modern look and intuitive operation, while the durable thermoplastic construction ensures long-lasting performance. Compatible with most MW Lighting fixtures and standard wall plates, this UL listed dimmer is ideal for both residential and commercial applications.

MDIM-SW

### HIGHLIGHT

#### Smooth & Customizable Lighting

Provides flicker-free dimming for precise brightness control, enhancing comfort and energy efficiency.

#### Wide Compatibility

Works seamlessly with most MW Lighting fixtures, making installation quick and convenient.
