

# MT-100W-BK

## 100W Transformer with Photocell

Project Name:	Order Number:	Prepare by:	Note:	Date:	Type:

This low-voltage landscape lighting transformer is designed to provide reliable and efficient power for outdoor lighting systems. Operating on 120V input and delivering a stable 12V AC output, it features a built-in photosensitive sensor with multiple timing options for automatic and flexible lighting control. The high-performance toroidal core ensures quiet operation, improved energy efficiency, and reduced heat generation. With a durable metal housing, wet-location IP44 rating, and ETL certification, this transformer is suitable for both indoor and outdoor installations, offering long-lasting performance and easy wall-mounted installation.

### HIGHLIGHT

#### Smart Automatic Control:

Built-in photosensitive sensor with multiple timer settings (ON / OFF / 2H / 4H / 6H / 8H) provides convenient, automatic operation from dusk to dawn.

#### Reliable & Efficient Performance:

High-performance toroidal core design ensures stable 12V AC output with quieter operation, improved energy efficiency, and enhanced protection with OCP and OTP safety features.

160\*279.50mm

### TECHNICAL SUMMARY

MODEL NO.	Wattage	Input	Output	IP Rate	Weight (Kg)	Material	Power Cord	CERTIFICATION
MT-100W-BK	100W	120V / 60Hz	AC12V	Wet Location IP44	5.1KG	Metal (Iron material)	1.5m, 18AWG	ETL
